### YOUR FIRE TRUCK DESERVES THE BEST GAUGE ON THE MARKET

Stewart Warner's DDBI™ is a complete line of "data-bus" gauges, tachometers & speedometers that can be interfaced with "Tier 3" electronic engines using the SAE J1939 format. DDBI™ provides a DIRECT connection to the vehicle's "bus" network—no separate instrument controller required (thus reducing costs).

### THE BOTTOM-LINE: MORE FEATURES & BENEFITS

- ☑ Superior accuracy, reliability & durability—ideal for fire service
- ☑ Built-in diagnostics functions protect your investment
- ☑ Totally sealed with anti-fog capability
- ☑ LED backlighting & lighted pointers; built-in LED warning lights
- ☑ Processes digital & analog (non-bus) inputs, such as brake pressure
- ☑ Reduces installed-system cost (no instrument controller needed)
- ☑ Instruments all read same information, regardless of where installed
- ☑ Great looks will complement your fire truck
