

BEST ELECTRONIC FUEL SENSOR ON THE MARKET!

GEN-III INTELLISENSOR®

Works in all hydro-carbon based fuels

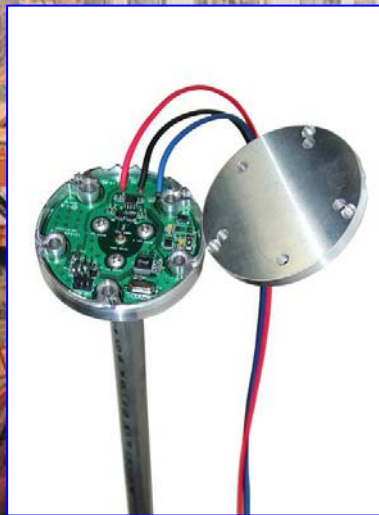

Self-calibrating

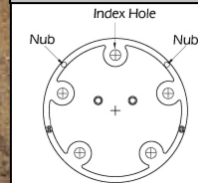

Level or volumetric measurement

Superior resolution (no steps)

Reinforced, section protects against slosh; corrosion-resistant materials

Easy installation

Replaces reed-switch sender

PRELIMINARY-ADVANCE COPY

CAN A FUEL SENSOR LAST AS LONG AS YOUR VEHICLE?

Why not? Our patented, 3rd-generation IntelliSensor® has been significantly upgraded with an all-new design featuring a *self-calibrating function*, so it can be used in ANY type of hydrocarbon-base fuel. It has no moving parts. And we selected the toughest, lightest and most corrosion-resistant materials possible. Best of all, it delivers a competitively priced, electronic fuel measurement solution OEMs can depend on, mile after mile.

BOTTOM-LINE: MORE FEATURES & BENEFITS

- ✓ Self-calibrating "green" solution for today's fuels (diesel, biodiesel, etc.)
- ✓ Level or volumetric measurement—better accuracy than other senders
- ✓ Near-continuous resolution—not limited by "steps" in level registration
- ✓ Wide operating range; corrosion proof materials
- ✓ Easy installation—fits SAE 5-hole flange opening; drop-in replacement
- ✓ Studs, flying leads & custom connector schemes available

GEN-III INTELLISENSOR® IS AN ECO-FRIENDLY FUEL MEASURING SYSTEM!
